

Here is an update on the COVID 19 outbreak and how we are coping with it.

Teletherapy adds an entirely new dimension of care to our arsenal, allowing us to treat our patients regardless of where they are during this pandemic and we will continue to treat those patients that need teletherapy for a variety of reasons. There may be families that want to continue treatment because of its convenience. Regardless of the reason, the decision will be completely up to the family.

Currently 100% of our families are being treated via teletherapy. This has been an overwhelming success and we will continue to treat children this way until it is 100% safe for patients to return to our clinic and for therapists to return to home visitations.

We are admitting new patients and performing evaluations through teletherapy quite successfully, so if you need our services please call us and we will set up an online evaluation with one of our therapists.

You will need a computer, or laptop or some other device and internet for our therapists to connect with you.

If you have questions, please call our office. If no one is available, please, leave a message and I promise someone will get back to you within 24 hours.

Dr. Jeff Herman
